A. Lexical topics follow turn rhythm
topic boundaries in collaborative floor / expected
real text
shuffled text
lexical tiling (original)
sentence embeddings
semantic network
network change
B. 'Early warning' is built in
rise of %DET variance before onset (Kendall tau, event − baseline)
real events
surrogate events
real, isolated events
surrogate, isolated
C. Event pairs come mostly from detection
share of inter-event intervals 30-75 s
0.277 → 0.316 (p = 0.015)
surrogate events
real events
D. 'The floor opens at events' is local entropy
reciprocity × near event
facilitator × near event
odds ratio of taking the next turn (95 % CI)
without control
controlling local entropy
